# Team Personal Media Tracker Sprint 1 Planning Document

## 1 SPRINT OVERVIEW

---

### 1.1 OVERVIEW

Sprint 1 will include the development of many notable features of Personal Media Tracker. This includes the development and finalization of the following components: searching for media titles, tracking the progress of media titles, and writing reviews and ratings for logged media.

### 1.2 SCRUM MASTER

Eric Chen

### 1.3 SCRUM MEETING TIMES

March 16, 2026 during lecture from 12:30pm to 12:50pm.

March 18, 2026 during lecture from 12:30pm to 12:50pm.

March 20, 2026 during lecture from 12:30pm to 12:50pm.

### 1.4 RISKS/CHALLENGES

Learning how to create an interface using Python.

Ensuring the features created are functional on different operating systems, Windows and MacOS.

Finding a database including both movies and TV shows.

## 2 CURRENT SPRINT DETAIL

---

### 2.1 REQUIREMENT 1

AS A USER, I WANT TO BE ABLE TO SEARCH THE SYSTEM FOR MEDIA TITLES.

#### 2.1.1 Tasks

<Each requirement has several tasks, pick the task and the estimate that will be implemented for this sprint>

| Task description                 | Estimated time | Owner              |
|----------------------------------|----------------|--------------------|
| Find and clean external database | 1-2 hours      | Eric Chen          |
| Create a search UI               | 0.5 hour       | Jessamine Magalona |
| Connect database to UI           | 2 hours        | Sasha Crawford     |
| Create a search function         | 2 hours        | Jessamine Magalona |

#### 2.1.2 Acceptance criteria

If this user story is implemented, the tester should be able to enter a title or keyword into the text field. After entering, the user should see various titles related or matching the user entry.

### 2.2 REQUIREMENT 2

AS A USER, I SHOULD BE ABLE TO TRACK THE PROGRESS OF MEDIA I AM WATCHING.

### 2.2.1 Tasks

| Task Description                                    | Estimated Time | Owner              |
|-----------------------------------------------------|----------------|--------------------|
| Create a track titles UI                            | 1 hour         | Jessamine Magalona |
| Create a track titles function                      | 2 hours        | Jessamine Magalona |
| Create a tracked titles database (account specific) | 1 hour         | Eric Chen          |
| Connect database to UI                              | 1 hour         | Sasha Crawford     |

### 2.2.2 Acceptance criteria

If the user story is implemented, the tester should be able to open a dropdown with the following criteria to choose from: Not Watched as default, Watching, and Watched. When selected, the choice will be noted in a database specific the account and visible on the user interface.

## 2.3 REQUIREMENT 3

AS A USER, I SHOULD BE ABLE TO WRITE REVIEWS AND SCORE THE MEDIA TITLES.

### 2.3.1 Tasks

| Task description                                                              | Estimated time | Owner              |
|-------------------------------------------------------------------------------|----------------|--------------------|
| Create a rating UI                                                            | 0.5 hour       | Jessamine Magalona |
| Create a review UI                                                            | 0.5 hour       | Jessamine Magalona |
| Connect input rating into a database                                          | 1 hour         | Sasha Crawford     |
| Connect input review into a database                                          | 1 hour         | Sasha Crawford     |
| Create a rating database for the user-input to funnel into (account specific) | 1 hour         | Eric Chen          |
| Create a review database for the user-input to funnel into (account specific) | 1 hour         | Eric Chen          |

### 2.3.2 Acceptance criteria

If this user story is implemented successfully, a tester should be able to insert a rating and review for their logged media title. Their ratings and reviews are saved in a database and visible on the user interface.
